

PROOF THE ANCIENT ORDER KILLED PRINCESS DIANA

● The ANCIENT ORDER chose Princess Diana, operated her and then killed her. Look at her name before she married Prince Charles.

	L A	S	E R
● DIANA SPENCER	L A D Y	D I A N A	S P E N C E R
D	R	Y	A R

● Before Diana married Prince Charles, she didn't have either "laser" or "ray" in her name. After marrying him, she had both "laser" and "ray" in "Lady Diana Spencer", read left to right and back IN A CIRCLE.

● Princess Diana was operated by these Laser Ray devices by the ANCIENT ORDER's doctors. Part of the reason she was chosen was her name. "Diana Spencer" begins with "D" and ends with "r", "Dr" from start to finish.

● The ANCIENT ORDER's doctors operated the "electrical Oscillations" of Princess

alpha rhythm also alpha wave α . A pattern of regular electrical oscillations occurring in the brain at a frequency of 8 to 13 hertz when a person is awake and relaxed.

beta rhythm also beta wave β . A pattern of electrical oscillations occurring in the brain at a frequency of 13 to 30 hertz when a person is awake and alert.

Diana's brain with these Laser Ray devices. The electrical oscillations are measured in "8 to 13" and "13 to 30 hertz." 8 - 13, 13 - 30. The first is 8 and the last is 30. 8 30. Princess Diana's car crashed on 8-30-97.

● There is something else about 8/30. August 30th is the 242nd day of the year. 365 - 242 = 123. 8-30-97 was exactly 123 days before the end of 1997. That would be the "1,2,3" day before the end of the year.

● Notice this passage from "1984". "IT WAS A BRIGHT COLD DAY...", "IT WAS A..B..C..D.." or "IT WAS 1..2..3..."

IT WAS A BRIGHT COLD DAY IN APRIL,
5

● The very next day, August 31, was the day Princess Diana died. That was the 243rd day of the year. The ANCIENT ORDER have two name-totals for the Beast of Burden:

● #1-Beast(47) + Burden(64) = 111.....	111
● #2-Beast(47) + of(21) + Burden(64) = 132.....	+132
	● 243

● The two name-totals for the Beast of Burden are 111 and 132. Added together they total 243, the day of Princess Diana's death.

● How many days did Princess Diana die from the ANCIENT ORDER's Beast of Burden day of February 2nd in 2005?

August 31 was the 243rd day. 122 left in 1997.....	122
1998 through 2004: 7 years or 2,555 days.....	2,555
2 leap years so add 2 more days.....	2
33 days until February 2nd in 2005.....	33
	● Total=2,712

● 2,712 = 2 x 2 x 2 x 3 x 113. This is the only equation you can get from 2,712. The two highest totals are 113 and 2x2x2x3 or 24. An ANCIENT ORDER code:the 113th day is April 23rd or 4/23. The 24th day is January 24th or 1/24. The code is to multiply those dates.

● 124 x 423 = 52,452 or 52452
That reads "52 for 52". The passage below is also from, "1984".

TWO AND TWO MAKE FIVE.

But then there came a sort of check. His mind, as though shying away from something, seemed unable to concentrate.
